

DIMEX

The DICOM Gateway

It's not a trick, it's a DIMEX

- The DIMEX platform can be your secret tool to make your interface project work!
- A flexible, robust, reliable and powerful gateway for a wide variety of applications
- Proven technology
- Affordable & easily available

DIMEX DICOM Gateway - Implementation

With DIMEX, SST has developed a "fast track" implementation strategy to make sure the gateway implementation is not holding up your project.

DIMEX solutions can be provided quickly. SST have got DIMEX gateways on stock which can be installed within 24 hours. These gateways will then be configured and tailored to your needs utilizing SST-Remote Maintenance Tools.

It is never too late for a DIMEX!!!!

DIMEX is a very versatile tool and comes in these "flavors":

- Workflow Management Gateway
- Worklist Management Gateway
- HL 7 Interface Engine
- GDT Interface Engine
- Automated QA Workstation
- DICOM Gateway
- Offline Storage/ Encryption Engine
- Remote Worklist Gateway
- Telerad Gateway
- Dose Indicator Gateway

DIMEX solutions can be implemented on a project specific basis. This means that we can adapt your DIMEX application to the needs of your customer or your project. So you can install your DIMEX before you know exactly what it needs to do!

DIMEX solutions are affordable and reliable tools for your project. Your customer is getting a workflow solution allowing for seamless integration and hassle-free operation.

If you need to say YES in a tender, call our tender hotline to find out how a DIMEX can solve your interface problems.
